ERA Consulting (UK) Ltd.
Our Ref: ERA/UK/APP/83 Date: 1st September 2008

POSITION AVAILABLE

Project Manager/Consultant (London) – Gene Therapy Product Development

We need a high calibre scientist with experience in gene therapy to help our continued business in this area and expanding client list.

ERA Consulting provides expert advice to the biopharmaceutical industry on strategic regulatory affairs and product development. Our team specialises in biological medicinal products, including advanced therapy medicines such as gene, cell therapy and tissue engineered products. Our clients range from small biotechnology start-up companies to the largest pharmaceutical corporations. ERA has a proven track record of success and has worked on over 350 medicinal products in its 21-year history. This places us in an unrivalled position as consultants in this demanding and highly specialised field.

We have a position in our competent team for a high-calibre scientist who has a sound understanding of gene therapy/virology and who is interested in moving into regulatory affairs and project management. This job is based at our London office, which is in proximity to the European Medicines Agency, and we also have offices in northern Germany, in Washington, DC, and Brisbane, Australia. We offer a stimulating working environment in an area of London benefiting from extensive re-development.

Applicants should have a life science qualification (e.g. Ph.D.) in gene therapy/virology. Knowledge of regulatory affairs is not a prerequisite; however, an understanding of the drug development process would be a considerable advantage. Excellent communication/writing skills and the ability to present scientific concepts in a clear and concise manner are essential. Applicants should have strong computer skills and be a native English speaker or equivalent. The company offers a competitive salary and this position provides an excellent training in the field. In addition, there will be opportunities within ERA for further career development and promotion within the organisation. For further information on ERA Consulting, please visit our website: www.eraconsulting.com.

Closing date for applications is 1st October 2008. Applications in the form of a comprehensive CV and cover letter, quoting the reference number ERA/UK/APP/83 should be addressed to:

Mr. Paul Cronin
